Experience

Creciendo Philippines

Feb - May, 2025

Full-Stack Developer Intern

- Architected and implemented role-based access control (RBAC) system end to end, covering access-rights schemas/models, server actions, permission hook, cached sessions, route-protection middleware, and dynamic sidebar and top-nav rendering that adapts to each users role.
- Implemented several optimized aggregation queries powering the dashboard , compensation modules, and settings for shift management, departments, and sub-departments.
- Built an animated SEO-friendly login page with optimal svg animation following the design reference.
- Collaborated with the team by discussing potential merge conflicts and following code conventions.

Software Projects

SmartSched: Automated Scheduling and Realtime Room Utilization

- Designed and developed Smartsched as a final capstone project, delivering a cross-platform system spanning a website, desktop application, mobile app, and ESP32 camera device, built with React, TypeScript, TailwindCSS, React Native, Electron, and Firebase.
- Implemented core custom-developed constraint-based algorithm that dynamically resolved scheduling conflicts across time, room, and instructor constraints, based off real-world constraints.
- Built unique dynamic fluid design and experience showcasing consistency and legible schedules.

HHR Statlab

- Developed an advanced website game stat optimization tool reaching over 30k MAU (Monthly Active Users) while keeping up with its game latest updates.
- Replicated exact game user interface design for better users familiarity and experience.
- Designed and implemented comprehensive features, including detailed gear and weapon stats, a level-to-stats calculator, total cost breakdown for equipment and enchantments, class compatibility toggles, skill sliders, and detailed damage analysis against specific monsters, dungeons, and variants.

Furpection (Pet E-commerce site)

- Developed the site mainly using vanilla HTML, CSS, JS, PHP, and MySQL.
- Applied a unique design that also enhances user experience for both Admin and Client page.
- A robust and secure system with encrypted SQL database support ensures user authentication, product browsing, wishlist management, cart functionality, and transaction tracking for a seamless and safe shopping experience.

Education

Colegio De Montalban

2021 - 2025

Bachelor of Science in Information Technology

Asian Institute of Computer Studies

2019 - 2021

Information and Communication Technology

Skills

Hard Skills: React, Javascript, Typescript, Nextjs, Tailwind, HTML, CSS, PHP, MySQL, Firebase, MongoDB, S3, Git, Python, Java, VB, C#, Lua, Linux, Figma, Unity, Photoshop, After Effects, Blender.

Soft Skills: Problem Solving, Multitasking, Creativity, Attention to Detail.

Awards & Certifications

1st Place, Programming Competition

May 22, 2024

ICS WEEK, Colegio De Montalban

Highest Grade in Programming (Java NC III)

December 10, 2019

Certificate of Recognition, Asian Institute of Computer Studies
